## **A BLOW FOR PEACE**

Multi-millionaire Cyrus S. Eaton told the press at his 75th birthday party at the Seignior Club on Saturday that the main threat facing the world today is not Communism but the possibility of a nuclear war. The Cleveland industrialist urged Canada to recognize Red China immediately, a move which he said could force a United States change of attitude towards that country and Russia. Mr. Eaton is seen puffing out the 75 candles that adorned his birthday cake. (See Page 36).
